June 15, 2007

Aloha All!

Attached are the **Maui MAY 2007 Sales Statistics.**

ATTENTION: We have just completed a major statistical change.

This month's statistics reflect the reclassification of two major Wailea projects (Kanani Wailea and Kai Malu) in the Multiple Listing Service from "Residential Condo" to "Condominium." As a result Wailea Residential and Condo statistics (unit sales numbers, average and median prices) have changed for the time span of October 2006 to May 2007. All reference to these numbers should be done within this month's statistical package and any here after.

IF you look at our earlier publications to compare to this month's, there will be vast inconsistencies.

Kau Malu, thus far, represents **56 sales**, averaging **\$1,153,031** for a total of **\$64,569,768**.

Kanani Wailea represents **33 sales**, averaging **\$1,425,482** for a total of **\$47,040,895**.

In short - These numbers were shifted away from "Residential" to "Condominium" property class.

This reclassification was done to better accommodate new hybrid types of projects that in some ways seem like residential homes and yet offer many of the conveniences and benefits of Condominium living. The decision to reclassify was made after thorough discussion and debate, understanding the effect it will have on statistics. All future sales for these projects will be under Condominium.

The general guidelines for classification are now:

- Resort or Apartment zoned + CPR = Condominium
- Residential, Rural or AG zoned + CPR = Residential Condominium (a subclass of Residential).

Brief overview:

Page 4 - May's **Sales Volume** - **Residential** and **Land Sales** rose somewhat from April while **Condo Sales** dropped slightly.

Page 5 - May's **Median prices** remained unchanged in **Residential** homes while **Condo** rose to \$531,325. **Land** median returned to near March numbers after April's jump to \$843,750 (due to six lots selling at Makia Nui - Laniupoko - ranging from 1.6 to 2.5 million dollars each).

Page 6 - **Days on Market** dropped slightly for **Residential** homes and **Land**, while **Condos** rose slightly. (Note: this is the average DOM for the properties that **SOLD**. If predominantly OLD inventory sells, it can move this indicator upward, and vice versa.)

Pages 10 - 14 - "**Year to Date Sales**" figures are starting to gain value as indicators as we are over 1/3 through 2007.

Residential Homes are showing more gains compared to 2006 Jan.-May, while **Condo** and **Land** unit sales and dollar volume have declined considerably. Better overview is available from these pages at the end of each year such as 2006's Year End (Dec. 2006) available at:
http://www.mauiboard.com/download_files/file_1168463298.pdf

IN A NUT SHELL.....

Expanded inventory and continued low interest rates provide plenty of options for Buyers. Realistic Sellers can beat competing properties with better property condition, careful pricing, good marketing, and flexible terms. Unrealistic Sellers will be left on the bench as sales continue in a healthy market. Zooming in on the figures of a specific geographic area or property type may lead to different conclusions than the overall view. (Choose carefully ;-)

Active/Pending/Contingent status inventory is as follows:

RESIDENTIAL = 985 units (down from April's 1,011 units)
CONDO = 1,261 units (April was 1,284 units)
LAND = 476 lots (all sizes) (April was 480 lots)

Disclaimer:

As always, I will remind everyone that Maui's market place is much smaller than Oahu's, and that a few high or low sales have a greater effect on the statistical numbers without necessarily indicating a big market swing one way or another.

If you have any questions regarding hard numbers, call my phone number below.

Mahalo,

Terry Tolman
Chief Staff Executive
808-270-4646
